Help Center
for Sitecore

Help Center for Sitecore is a powerful tool that allows you to create a complete website management guide inside Sitecore... and allow your users to get immediate access to help info while managing your website.

Help Center for Sitecore provides contextual help on the current item being viewed as well as its own UI for a full indexed manual for guidance about specific content as well as information independent of individual items - such as content writing style guides, SEO rules, Sitecore tips and tricks, brand standards and more.

Protect your investment in your Sitecore implementation by making sure your authors, designers, developers and administrators use the system as-designed and to its fullest potential. Help Center for Sitecore allows you to give your business users all of the resources they need to do their job correctly and efficiently.
